About NewGen

NewGen Strategies and Solutions, LLC (NewGen) is a boutique Energy, Economic, Financial, and Environmental Consulting firm specializing in providing professional services to public and private sector utilities. The firm provides a wide variety of consulting services to electric, water, wastewater, solid waste, and natural gas utilities, in addition to regional planning agencies, utility commissions, state and federal agencies, law firms, and financial institutions.

We are a small firm (35 employees) allowing us to be responsive to clients and offering our employees direct exposure to our industry experts and senior management within the company. We have a collegial and supportive culture, and embrace teamwork and individual contributions to our projects, all of which leads to high job satisfaction. We believe employee development through training, mentoring and project exposure is key to delivering high quality consulting services through motivated teams.

We also value the communities in which we live and work, and accordingly commit 1% of revenue to charities within our communities. All employees have a say in how and to which organizations these funds are donated.

Providing consulting services is hard work, full of project deadlines and client deliverables. We pride ourselves on the work we accomplish for our clients, but we also make time for socializing, and sharing life experiences, hobbies and personal accomplishments. We value talented, enthusiastic, bold, and creative individuals who seek to make an impact in important industries within our society.

Job Description

NewGen is currently hiring at the undergraduate and/or graduate level for an Analyst role in our Austin, Texas office. Duties of this position include, but are not limited to:

- Perform quantitative and qualitative financial modeling and cost accounting
- Conduct econometric analyses employing descriptive and predictive analytics to summarize large sets of historical data from various platforms
- Support development of financial models with user-friendly dashboards to improve flexibility in decision making addressing our client's most challenging problems
- Develop project status reports and prepare reports and memoranda summarizing research findings, statistical data analysis, and results

This position is a full-time position, with benefits including holidays, personal time off and a retirement program.

Required Skills

- Strong analytics background or formal education in transforming large datasets into coherent observations and quantitatively supported recommendations
- Requires experience with Microsoft Office and a high proficiency working in Excel
- Advanced knowledge of Power Query, PowerPivot, and PowerBI is a plus

Analyst Position

Required Skills (Continued)

- Candidate must be team-oriented and demonstrate analytical skills in the areas of economics, financial planning, and utility accounting
- Candidate must be detail-oriented, be able to follow written and oral instruction, and have strong, clear, and concise written and verbal language skills

Education and Experience

- A degree or strong background in a quantitative discipline(s) including economics, business/finance, mathematics, data analytics, and engineering disciplines is required. Understanding of basic business financial statements and accounting principles is desirable.
